## Professional Summary

Android Developer with 1+ years of experience building scalable and high-performance mobile applications. Skilled in **Kotlin**, **Java**, **Android SDK**, **MVVM**, and **REST API** integration. Strong in debugging, UI development with XML, clean architecture implementation, and optimizing application performance and usability.

## Work Experience

### Software Developer

Alt Digital Technologies | Sirsi

Feb 2024 – Present

#### Projects

##### **Boeing Distribution Connect (BDC)**

Developed and enhanced core features of the Boeing Distribution Connect app used for aircraft parts ordering, inventory management, and logistics tracking by using **Kotlin**, **Retrofit**, **XML**, and **Wiper architecture**, implementing scalable code structures, building responsive Material Design screens, and optimizing performance to improve app stability and usability.

##### **The Mestri App**

Built and improved major features for The Mestri app, a platform connecting local skilled labourers with work providers. Developed UI screens using **Kotlin** and **XML**, integrated **REST APIs** using Retrofit, and optimized overall performance, usability, and stability across the application.

# **Education**

**The Oxford College of Engineering, Bangalore**

**BE – Electrical and Electronics Engineering**

**Jun 2019 – Sep 2022**

**GPA: 7.32**

# **Technical Skills**

- **Languages:** Kotlin, Java
- **Android:** Android SDK, XML Layouts, Material Design
- **Architectures:** MVVM, Wiper
- **APIs:** Retrofit, RESTful APIs, JSON
- **Tools:** Android Studio, Git, Postman
- **Other:** Debugging, Unit Testing, Clean Code Practices

# **Languages**

- English
- Hindi
- Kannada
